

L BRACKET

The innovative Manfrotto L Bracket is the ideal solution specifically designed to match perfectly your needs.

Change photo formats in a snap!

Tired of continuously resetting the tripod position to achieve the perfect photo both in landscape and portrait position? Manfrotto has the solution: a new generation of professional accessories specifically designed to match perfectly your need to quickly flip the camera position in portrait mode without upsetting the shooting position. The Manfrotto L Bracket helps to stabilize the whole system, centering the camera's weight over the tripod: in this way your lens won't move and you will maintain the same high level of precision, stability and ergonomics when flipping from landscape to portrait position.

The L Bracket is a great accessory universally adaptable to any camera body which has been designed to give the maximum stability and safety to professional photographers. Special anti-rotational systems perfectly fit around the camera body ensuring a strong and firm grip stabilizing any heavy professional equipment. Moreover, the durable magnesium provides strong construction and lightweight transportability. The L bracket comes in three different quick release configurations, providing compatibility with all the Manfrotto QR attachment (Q2, RC4, Q5).
