**T* UV filter and
T* POL filter (circular)**
Quality from ZEISS.

We make it visible.

T* UV and POL filters from ZEISS.
Quality down to the last detail.

The name ZEISS has been synonymous with quality down to the last detail ever since Carl Zeiss opened his optical workshop in 1846.

Your photos now also benefit from this quality. Demanding photographers know that a perfect photo requires perfect conditions: the subject, of course, but primarily the camera equipment. For this reason, ZEISS offers lenses that more than meet these demands. The offer is rounded off with the right UV and POL filters featuring the T*[®] anti-reflective coating – for exceptional quality.

**Ensuring that your photo is incomparable.
Each time.**

FEATURING T*ANTI-REFLECTIVE COATING

Location: Bonneville Salt Flats, Utah, USA

Date: 29th October 2010

Filter: **ZEISS T* UV filter**

Crystal clear: the UV filters featuring the T* anti-reflective coating from ZEISS provide optimal protection for the front element of your lens. They also ensure absolute brilliance without altering the color rendition or exposure time.

For colors as rich as in nature.

Technical data

ZEISS T* UV filter

Diameter

Quality

High-quality glass featuring ZEISS T* anti-reflective coating

Flexibility

High-fit accuracy for fast filter change.
Can be used with a lens shade

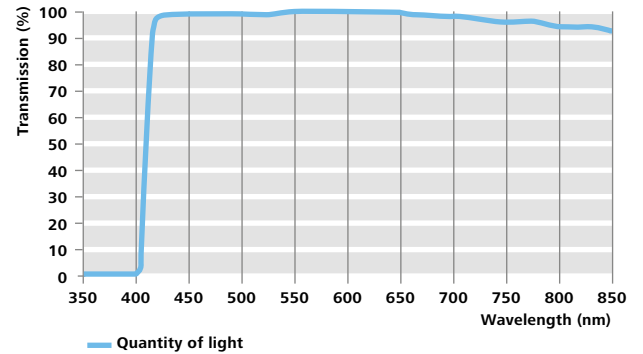

Compatibility

Ideal for ZEISS lenses. Can be used with non-ZEISS lenses

Effect

Optimal protection of the front lens element and more clarity for your photograph

ZEISS T* UV filter

FEATURING T*ANTI-REFLECTIVE COATING

Location: Pulau Nias, Sumatra, Indonesia

Date: 20th November 2010

Filter: ZEISS T* POL filter (circular)

Discover something new: the POL filters featuring the T* anti-reflective coating from ZEISS provide you with entirely new photographic insights by avoiding reflections on non-metallic surfaces. Experience a new definition of color and contrast.

For photos that become revelations.

Technical data

ZEISS T* POL filter (circular)

Diameter

Precision Rotary mount to set the filter effect (light reduction: 1.5–2 EV)

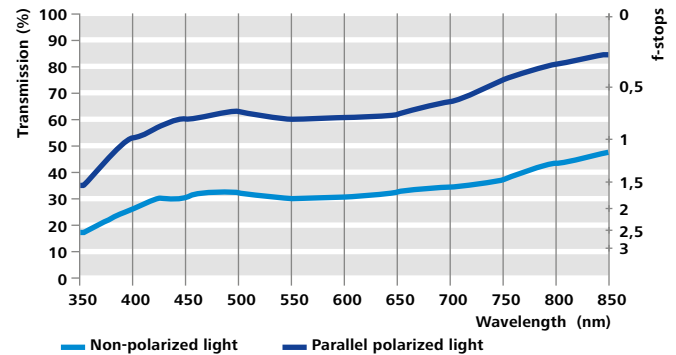

Quality High-quality glass featuring ZEISS T* anti-reflective coating

Flexibility High-fit accuracy for fast filter change. Can be used with a lens shade

Compatibility Ideal for ZEISS lenses. Can be used with non-ZEISS lenses

Effect Minimizes light reflections on non-metallic surfaces and increases the color saturation of long-distance shots
