

Lowepro®

Optics Series™

# Optics Series: purpose built for protection, comfort and easy transport

---

Most birders and wildlife watchers set out to explore the natural world with three key items: binoculars and/or a spotting scope, a field guide and a notebook. Now there is a fourth element designed to improve the experience—a carrying solution. Read more about our four innovative bags, purpose built to offer comfort, protection, organization and support.

---

**Field Station**  
A beltpack with a hands-free QuickShelf™ platform

**Scope Travel 200 AW**  
A flexible travel and field backpack

**Scope Photo Travel 350 AW**  
The ultimate travel and field photo-optics backpack

**Scope Porter 200 AW**  
A hands-free backpack for a spotting scope and tripod set-up

# Enjoy the view with a hands-free backpack

## Field Station

Beltpack

---

- Read a field guide or take notes, hands-free.
- Be comfortable all day long.
- Carry exactly what you need.

**Fits:** binoculars, field guide, personal items

# Field Station

---

You're on a walk to watch birds with binoculars, field guide and a notebook. One thing is missing: a carrying solution. The Field Station, part of Lowepro's Optics Series™, is a purpose-built backpack designed to offer comfort, hands-free support and convenient access to your gear.

- Carry everything you need for a day out in the field: binoculars, field guide and personal items.

- Enjoy all-day comfort and support with the thickly padded mesh backpad and adjustable waistbelt.

- Use the stable, hands-free QuickShelf™ platform to find a species from a guide or make notes on an observation.

- You even can use the QuickShelf™ platform as a secure base for a tablet-style computer.

# Travel and explore with the ideal optics backpack

## Scope Travel 200 AW

Backpack

---

- Protect and organize your kit.
- Carry your valuable gear on a plane.
- Observe with more ease.

**Fits:** spotting scope, tripod, binoculars, compact camera, field guide, personal items

## Scope Travel 200 AW

---

Your destination: to watch birds or wildlife with a spotting scope, digiscope, camera, binoculars and personal items. The carrying solution: a modular optics backpack that offers protection and flexibility as you travel and observe. Three padded compartments allow you to customize your kit—add or subtract to suit your outing.

- Customize the interior with everything from a spotting scope to binoculars, a camera to personal items.

- Need a tripod for your scope? Attach it via a foot cup and compression straps for a secure fit.

- Place items you want to quickly grab—field guide, notebook, pen, etc.—in a roomy and organized front compartment.

# Customize your gear for birding and travel

## Scope Photo Travel 350 AW

Backpack

- 
- Have a DSLR and laptop within reach.
  - Carry everything you need for travel or field observation.
  - Organize in multiple ways.

**Fits:** spotting scope, tripod, binoculars, DSLR, extra lens, laptop, field guide, personal items

# Scope Photo Travel 350 AW

---

You like to carry a lot of gear. Everything that helps you spot, observe, digiscope, shoot, note, upload and blog. So a carrying solution that fits and protects your spotting scope, tripod, binoculars, camera, lenses, laptop and personal items would be ideal. We have the ultimate travel and field pack for you.

## In-transit set-up

- Padded compartments, including a customized DSLR compartment (in black), help organize gear and let you add and subtract as needed.

## In-field set-up

- Place the black customized DSLR compartment at top of pack for easy access. Add or subtract any of the five compartments to customize your kit.

- A front organization pocket is full of storage options; a padded laptop pocket keeps your workstation close at hand.

# Carry a tripod and scope set-up in true comfort

## Scope Porter 200 AW

Backpack

---

- Enhance your optics portability.
- Attach a large spotting scope and tripod in two set-ups.
- Use multiple adjustment points for all-day comfort.

**Fits:** spotting scope, tripod, hydration reservoir, field guide, personal items

# Scope Porter 200 AW

Would you like the freedom to observe with more ease and more comfort? The inventive Scope Porter 200 AW backpack gives birders and wildlife watchers a hands-free, protective and supportive way to carry a large spotting scope and tripod in the field.

- Stay hydrated in the field with the aid of a dedicated hydration pocket with port (reservoir not included).

- A built-in All Weather AW Cover™ protects gear when pack is used with or without tripod attached.

- Attach your tripod (with scope) on either shoulder strap for a hands-free option.

- You can also carry your scope and tripod set-up at your back. Set it down and enjoy an on-the-spot observation.

# Behind each Lowepro design

We've designed protective, accessible and comfortable carrying solutions for the world of imagery since 1967. Our Optics Series™ is purpose built with the same thoughtful attention to detail. Each product is crafted to enhance your enjoyment while observing birds and other wildlife, and provide protection while traveling to each destination.

## Protection

- What's a hallmark of all Lowepro products? Protection. Our patented All Weather AW Cover™ is a built-in feature on all three backpacks. Think of it as a raincoat for your gear. The entire Optics Series is built with rugged, water-resistant outer materials to safeguard equipment and personal items from dust, sand and moisture.

## Comfort

- What makes your viewing more pleasurable? Long-wearing comfort. Our beltback and backpacks are constructed with padded, mesh-covered waistbelts and backpads to provide cushioning and help wick away moisture.

## Support

- Comfort goes hand in hand with support. You can easily fine-tune the fit of our designs with multiple adjustment points at the shoulders, sternum, waist and lumbar. Our supportive harness systems help with load adjustment—so you can view all day long and not feel burdened by the weight of your gear.

## Organization

- Gear up. Gear down. Carry a heavy load. Carry a lighter load. It's all possible with the Optics Series' clever and flexible organization systems. Modular compartments in the backpacks allow you to customize your kit to suit your plans. Multiple organization pockets in each design allow you to keep all your personal items within easy reach.

## Details

- Thoughtful details are inherent in each of our bag designs. We used silent zippers and clips to cut down on noise as you observe. We added pen holders to ease in note taking; mesh pockets for water bottles; quick-access pockets for cell phones or lens caps, sunglasses or keys. We even added a safety whistle on the sternum strap buckle in case you need to alert others. No detail is too small, but we hope, always appreciated.

# Connect with fellow observers

We're here to share information with you—including details about products, distributors, events, adventures, news and profiles of the photographers and nature lovers who rely on our gear.
